Each Pop Up is checked prior to shipping for quality.

No claims will be honored for out of round units due to not following the proper closing technique.

POP UP TENT WRITTEN FOLDING INSTRUCTIONS

IMPORTANT: Please allow a 6-7' clearance around the bag when opening as it will spring open to its full height. The zippered rear portion of the tent (20x 20") is designed to accommodate an exhaust fan. This zipper should only be opened while the tent is in the flat position.

OPENING INSTRUCTIONS:

1. Unzip the convenient carrying bag and remove tent. Exercise caution when opening the tent the first time as it will come out of the carrying case flat and then "Pop" itself up into the upright tent.
2. Once the tent is erected, pull the panels apart gently so that you are left with three walls and an opening for entrance.

IMPORTANT: When you are through with your tanning session, wipe down the inside of the tent with either a baby wipe or a towel and water.

CLOSING INSTRUCTIONS:

1. Collapse room by bringing opposite corners of the room together to form a double flat panel. Fold the double panels in half to form a single flat panel.
2. Place the "Top" of the room against a wall, corner or any thing that is stationary.
3. Grab the bottom of the room on each corner with both hands and walk/ push against the wall to form a "U" like you are trying to fold the room in half. As you do this the "Bottom" will curve in also forming a "U" shape.
4. Bring your right hand inside towards the left side slightly rotating your right hand inwards and the unit will start to form a circle within the left side. Push down towards the floor and the room will collapse into the original circle.
6. When this is done correctly, the room will collapse easily and fold to the proper size to fit into the carrying bag.

DO NOT FORCE THE FOLD. THE FOLDING TECHNIQUE WILL TAKE A LITTLE PRACTICE, BUT IT WILL FOLD BACK DOWN TO ITS ORIGINAL CIRCULAR SHAPE.

FOLDING INSTRUCTIONS

ATTENTION: Your Pop-Up Spray Tanning Cubicle is guaranteed against fault in the fabric & workmanship only. It does not extend to the spring steel frame, which has been carefully checked for before it leaves the factory. If folded correctly according to instructions, the panels should tuck into each other naturally. If you encounter difficulties, do not force as this may cause the steel frames to twist or bend.

Instructions & Care

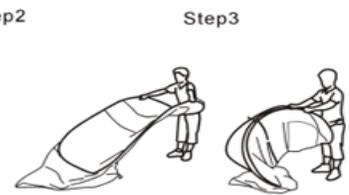

1. Unpack in an open area with caution
2. Do not unpack on a concrete floor as fabric may be damaged by abrasion
3. Do not use in extremely strong winds nor leave out in the rain
4. Store in a clean, dry place when not in use. Do not store when damp
5. Use tent pegs & guy rope to secure your Pop-Up Spray Tanning Cubicle

Push any corner in towards the opposite corner to reduce four walls to two double panels

Fold two double panels together to form one flat tiered structure.

Hold onto each side near the top/bottom. Gently bend the panels in half. Until the top touches the inside rim of the base portion.

Step4

Pull the sides together in **CROSSED** arms position, bringing your left hand over your right hand to tuck one coiled section inside the other.

Step5

Place Cubicle on ground of flat surface and squeeze out remaining air

Step6

Place Cubicle on ground of flat surface and squeeze out remaining air

Step7

Stuff folded Porta-Privy into carrying bag for storage
