

	<p>Untanned natural Skintype in Spring (with no UV exposure)</p>	<p>Recommended TBT Product (this is only a suggestion, adjust based on your client's unique needs)</p>
<p><b>TYPE 1</b></p>	<p>Rarely tans, if so it takes a lot of work, tan is a light beige or just pink. Always burns easily in less than 15 min, face is sun sensitive and burns easily. Normally has freckles. You are Ivory, light and fair skinned. Light hair, Blond or Red, Light blue or light hazel eyes. When you burn you have pain, blistering, peeling, redness. You will not see a suntan immediately after UV exposure. (within 24 hours) If you tan from UV it is very light.</p> <p><b>Can turn orange easily</b></p>  <p>Wears cosmetic foundations in Ivory, Pale or Fair depths</p>	<p><b>Tan ExtraordinAire 5%</b>  <b>Tanfastic 6.5%</b>  <b>Revive 7%</b>  <b>Tan Envy 7.5%</b>  <b>Rapid Tan, 2 hr–3 hr.</b>  <b>Veneto 6%</b></p> <p>Client can adjust shower time for a lighter tan if needed, or to prevent orange tones. (all blends)</p>

## TYPE 2

Can tan lightly, takes work Usually burns easily in 15 – 25 minutes, face burns easily. Your UV tan is light to light beige. You have Fair and Light skin, Blue, green or hazel eyes. When you burn you have pain and peeling, and redness. You will not normally see a UV tan immediately after UV exposure (within 24 hours)

**Can turn yellow, brassy or orange easily**

Wears cosmetic foundations in Fair, Light, Beige depths

**Tan Extraordinaire 5 -8%**  
**Tanfastic 6.5-8.5%**  
**Revive 7%**  
**Tan Envy 7.5%**  
**Rapid Tan 2-4 hr.**  
**Veneto 6%-8%**  
**Natural Tan 8%**  
**Aussie Bronze 8%**

Client can adjust shower time for a lighter tan if needed, or to prevent orange tones. (all blends)

If they experience yellow tones, use Veneto or Tan Envy

## TYPE 3

Tans easily but still can burn but not easy. Your tan turns to a light to medium brown. **Most common skin type in the US.**

You may have some freckles. Medium skin tones. Usually you will see a tan right after tanning (within 24 hours). UV Tan color is usually beige or light-med brown.

Face can burn in the sun. Body takes 25-40 min in the sun before burning. (if you have no tan) If you burn you get pinkness, some redness, and some peeling.

Easiest skin tone to tan

Wears cosmetic foundations in Med, Beige, Honey depths

**Tan ExtraordinAire 8 -10%**

**Tanfastic 8.5-10.5%**

**Revive 9%**

**Tan Envy 9.5%**

**Rapid Tan 4 hr-5 hr**

**Veneto 8%-10%**

**Natural Tan 8-10%**

**Aussie Bronze 8%-10%**

## TYPE 4

Tans easily, burns rarely. No freckles, you can get sunspots. A few hours in the sun and you are very tan, not generally burned.  
It is much easier for you to tan, and tan darkly quickly compared to a type 3. Always sees a tan after tanning (within 24 hours).  
UV Tan color is usually brown to olive. Dark hair and eyes normally. Face rarely burns in the sun. Body Takes more than 40 minutes in the sun before burning. If you burn you never peel, rarely get red.

May be difficult to create a DHA tan of the same darkness of their UV tan

Wears cosmetic foundations in Med-Dark, Dark levels

**Tan ExtraordinAire 10-12%**  
**Tanfastic 10.5-12.5%**  
**Revive 9-11%**  
**Tan Envy 9.5-11.5%**  
**Rapid Tan 6 hr. or overnight**  
**Veneto 10%-12%**  
**Natural Tan 10-12%**  
**Aussie Bronze 10-12%**

Can often use the darkest blends, can leave Rapid on longer than 6 hours for deeper color.

Please remember, choosing a higher DHA% thinking you will be darker or browner does not always work.

Off color development (orange), rapid and uneven fade off, crackled fading, dryness can all result.

It is always better to apply a lower concentration product if you are unsure.

If your resulting tan is too light **after 24 hours**, you may reapply a second light coat if needed.

To dark a tan can be difficult to remove

**The above is only a rough guide, however some clients may need an adjustment of product DHA used, or one blend may work better than another. Use your best judgment.**
